Same normalization: Migkas $A/A_{\rm all}$ vs our A/A_i

Migkas Fig. 8 — $A/A_{\rm all}$ ($\theta = 75^\circ$ cones)

cold spot $\sim(280^\circ, -20^\circ)$ [= their A/A_i]

Ours — A/A_i with $A \propto 1/H_{\rm obs}^2$, $A_i = \langle A \rangle_{\rm sky}$
